

Guide to eduroam access at Aarhus University on Apple iOS devices:

Open the link <http://bit.ly/amo6Og> on your Apple iOS device (devices without cellular data access will have to do this on another network).

The device starts a profile installation procedure. Press the button “Install”.

The installer will warn about changing your current configuration. Press the button “Install Now”.

Enter your eduroam id and password (see <http://eduroam.au.dk/en>)

Press the button “Done” when the profile has finished installing.

Go to “Settings”, choose “General”, choose “Wifi”.

Choose the network “eduroam” from the list.

The device connects to the eduroam wifi network requests that you accept the network certificate. Press the button “Accept”.

A check mark next to the eduroam label indicates that connectivity has been established.

Troubleshooting: In case of problems try removing the profile and step through the guide again. Take care when entering your eduroam id and password (try verifying that they work at <https://mit.au.dk/?sp=en>).

In order to remove the profile: Enter “Settings”, choose “General”, scroll to the bottom and choose the profile. Press the button “Remove”
