# EDUROAM LINUX MINT V. 13 - MAYA

Eduroam is the preferred network for students and staff at Aarhus University. You can get easy and automatic access to the internet anywhere at Aarhus University or at other universities in Denmark or abroad with eduroam, since it is an international collaboration with hundreds of universities participating worldwide. Visit www. eduroam.org to see the list of participating institutions.
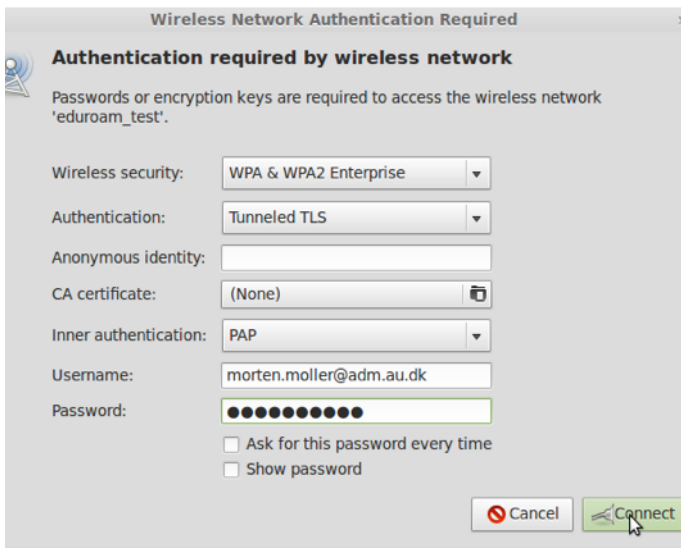

Easy for the user and easy for the university

You only need to set up eduroam once on your machine. It automatically connects when it detects eduroam in the air. This also applies if you visit a university in another country where eduroam is also available. The university is not required to handle guest login and separate network access for guest students or teachers.
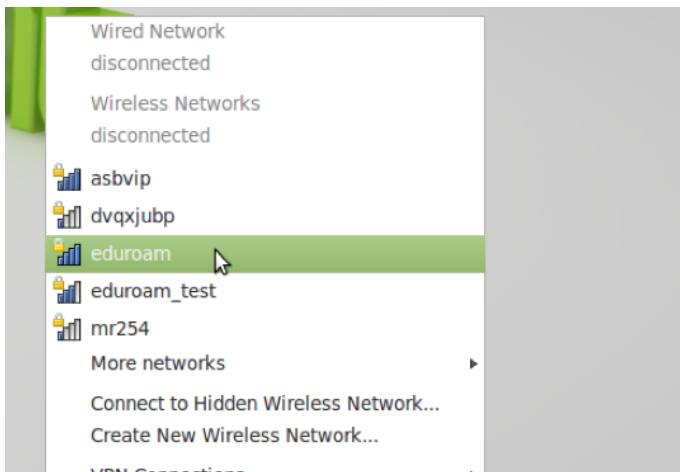

Press the network icon (bottom right corner), and choose "eduroam".

Choose PAP in the "Inner authentication" field.

THIS GUIDE HAS BEEN PRODUCED BY

ADVANCED MULTIMEDIA GROUP

Advanced Multimedia Group is a division under AU IT supported by student assistants. Our primary objective is to convey knowledge to relevant user groups through manuals, courses and workshops.

Our course activities are mainly focused on MS Office, Adobe CS and CMS. Furthermore we engage in e-learning activities and auditive and visual communication of lectures and classes. AMG handles video assignments based on the recording, editing and distribution of lectures and we carry out a varied range of ad hoc assignments requested by employees.

In addition, AMG offers solutions regarding web development and we support students' and employees' daily use of typo3.

ANALYTICS GROUP

Analytics Group, a division comprised of student assistants under AU IT, primarily offers support to researchers and employees.

Our field of competence is varied and covers questionnaire surveys, analyses and processing of collected data etc. AG also offers teaching assistance in a number of analytical resources such as SAS, SPSS and Excel by hosting courses organised by our student assistants. These courses are often an integrated part of the students' learning process regarding their specific academic area which ensures the coherence between these courses and the students' actual educational requirements.

In this respect, AG represents the main support division in matters of analytical software.
